

# Introducing the new Benelli Super Black Eagle 3!

This shotgun has a 3 ½” chamber with an inertia-driven operating system. This allows you to use all types of ammo from light 1 ⅛ ounce clay loads to high power goose-busters. The rotating easy locking bolt system never requires adjusting and will consistently cycle round after round without flaw. Unlike gas systems, Benelli’s inertia-driven shotguns keep the gunpowder and gases out of the action and in the barrel where they belong.

The SBE 3 features new ergonomic designs including an improved grip-to-trigger and forend wrap geometry. Gloved-hand operation is now effortless with the newly designed oversized bolt release and safety button, an outward angled drop lever, and a larger charge handle making it easier to operate.

Loading is made easier with the newly designed loading port. It features beveled edges, a redesigned carrier, and a new two-piece carrier latch.

User comfort was greatly considered in the design as the SBE 3 comes with the Comfort Tech 3 stock. The Comfort Tech 3 stock includes extra-soft Combtech recoil pads that require no tools to remove, making in-the-field adjustments or replacements fast in any condition.

This shotgun also features Benelli’s latest treatment from advancements in technology and cryogenic physics. During the cryogenic treatment, the barrels are exposed to temperatures of -300 degrees Fahrenheit , changing the steel at the molecular level. This treatment helps eliminate the stresses of hammer forging, creating smoother surfaces in the bore of the shotgun. With smoother surfaces, there is less resistance for shot and wads creating better, more consistent patterns while also staying cleaner longer.

Benelli Prostaff members have tested this shotgun in the harshest conditions of rain and mud and time after time the Benelli Super Black Eagle 3 continues to perform flawlessly.

Available in Realtree Max-5, Gore Optifade, Mossy Oak Bottomland, and black synthetic.

The SBE 3 will soon be available at Kittle’s Outdoor & Sport Co., make sure to stop by and order yours before next waterfowl season.
