

Measuring Your Bike Fit

The following measurements are to be recorded in centimeters and transferred onto the bicycle in sequential order:

- 1. Saddle Height: The distance between the top of the saddle to the centerline of the pedal spindle, along the plane of the seat tube
- 2. Set Back: The distance between the tip of the saddle and the centerline of the bottom bracket
- 3. Fit Stack: The distance between the centerline of the stem's handlebar clamp to the center line of the front wheel's hub
- 4. Fit Reach: The distance between the tip of the saddle and the centerline of the stem's handlebar clamp
